US Representative Michael Turner
1740 Longworth House Office Building
Washington DC 20515

Dear Representative Ney,

I am writing you today to encourage your support for HR 4167, the National Uniformity For Food Act of 2005. This legislation has broad bipartisan support, beginning with its cosponsors, Congressman Mike Rogers (R-MI) and Congressman Ed Towns (D-NY).

The National Uniformity for Food Act provides for national, uniform food safety standards and warning requirements. The legislation amends the Federal Food, Drug and Cosmetic Act to create a uniform, national system that not only recognizes the role of state local governments in the regulation of food products, but also integrates them into a national system.

Right now, food regulation is composed of a variety of different and sometimes inconsistent requirements. HR 4167 seeks to iron out those inconsistencies and works towards national uniformity.

Members of the Ohio Licensed Beverage Association serve not only beverages, but also the food products covered under this legislation. The OLBA supports uniform labeling of all consumer products because it creates a fair playing field for manufacturers, wholesalers and retailers. Please consider this when making your decision about HR 4167.

Sincerely,

Jacob C. Evans
Vice President of Government Affairs
